# THE PROJECT

The architecture of the **sixty-nine villas** of SOLEIA LIVING EL CHAPARRAL blends with nature and reinvents the traditional Andalusian style. A refuge where the natural beauty of the environment merges with a passion for golf, water sports and the slow life

The spacious terraces of SOLEIA LIVING EL CHAPARRAL are much more than just an outdoor space. Their smart design allows for a fluid and harmonious connection between the interior and exterior spaces, making them the perfect place to admire the spectacular sea views and experience the serenity and peace that can only be found in an idyllic setting like this.

We want you to enjoy the luminous and relaxing interiors that propitiate a comfortable and peaceful home setting. To achieve this, each nook and cranny was carefully designed to make the most of the natural light, with large windows through which the sun's rays flood the rooms, generating a sense of spaciousness and vitality.

The designer kitchens are equipped with high-end branded appliances for enjoying an efficient, functional space without compromising on style.

Bedrooms and bathrooms are important spaces in any home, its most intimate and personal nucleus, so it is crucial for them to be pleasant places to feel comfortable and switch off from your day-to-day routines, relax and be yourself.

SOLEIA LIVING EL CHAPARRAL boasts spacious rooms providing a fluid movement between them, generating a greater sense of freedom, further enhanced by its south-facing orientation and large windows through which sunlight and brightness is guaranteed, favouring the creation of a cozy and warm environment that benefits your health and improves your mood thanks to the visual beauty and greater connection with nature.

**QUALITY**  
OF LIFE

**SOLEIA LIVING EL CHAPARRAL is a lifestyle.** Your wellbeing is our priority and here you will find every comfort and amenity you could wish for.

Your **security** is very important, so we fitted security doors to the villas and have a video door entry system in place. The garages also have automatic doors that open via remote control. Furthermore, the garages are equipped with protection systems and mechanical ventilation

We know how important the **environment** is. Avoiding pollution of any kind is one of our objectives, and so the lighting of our exterior paths takes the form of LED beacons to prevent light pollution while also contributing to energy savings and the sustainability of all common areas. For those most committed to green driving, we have pre-installed a charging station for electric vehicles in all parking spaces and offer the option of installing the charging device.

And we have not forgotten people with **reduced mobility**, for whom SOLEIA LIVING EL CHAPARRAL will have access ramps and external lifts for easy transit between the different levels of its common areas. In addition, some units offer as an option the installation of an individual lift in the house.

We know how much you enjoy coming home and relishing your stay, so we designed these villas to be the HOME you deserve. We have not forgotten a single detail.

It is important that you have harmonious spaces, with a fluid layout and high quality materials and finishes designed to maximize the feeling of comfort. This is why the villas have thermal insulation adapted to the climate needs of the area and **PORCELANOSA\*** sprung floorboards throughout the house except in bathrooms, laundry rooms and terraces, where **KERABEN\*** brand porcelain tiles been laid.

All rooms have large windows that maximize the natural light and generous terraces with garden that connect you immediately with the natural surroundings. There is low-emission double glazing throughout, with a **CLIMALIT\***-type air chamber and solar control, top quality profiles with thermal break and a micro-ventilation system to improve energy efficiency and power savings.

**The kitchen** is one of the most important spaces in a home and at Soleia Living El Chaparral, with their open-plan layout and **Italian-designed** furniture, will also be the place for socializing and sharing the preparation of your favourite recipes with your family and friends. The homes will be delivered fully furnished, with large-capacity high and low units, countertop and front in **SILESTONE\*** and **BOSCH\*** branded appliances including extractor hood, ceramic hob, oven, microwave, washing machine and built-in dishwasher and refrigerator to make this the kitchen of your dreams. You will have different customization options available

Bathrooms are yet another area that deserve special attention because they are the protagonists of your moments of rest and relaxation. In the bathrooms all sanitaryware will be glazed porcelain except for shower trays, which are made of resin, a material that makes them strong and warm to the touch, all from the **PORCELANOSA\*** brand. Washbasins are double-basin and recessed in the main bathroom, delivered with drawer units and a monoblock tap in a chrome finish from the **HANSGROHE\*** brand. All domestic water will be heated by a **DAIKIN\*** Altherma Monobloc heat pump located in the laundry area.

\*The proposed brand may be replaced by a similar brand depending on market availability.
